

## Immunization Policy

Please keep your child home for 24 hours after having any immunization so you can closely monitor them.

While many infants do just fine after an immunization others have side effects that can be very scary or even life threatening (fevers, seizures, nausea, fatigue). We want to make sure your infant is safely at home where he or she can have 1 on 1 monitoring during the 24 hours after an immunization.

Thank you for your understanding and cooperation

- *Most our families choose to schedule all vaccine appointments on a Friday afternoon that way work is not missed.*
